## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 0 834 991 A1, denoted in the rejection by EP991.

#### **Claim 1:**

The EP991 discloses:

“first means for performing pre-scan processing for successively tuning in on channels previously set, to examine whether or not a received signal on each of the channels is of a predetermined quality or more, and temporarily registering the channel numbers of the channels on which the received signals are of the predetermined quality or more in a storage device as receivable channel candidates”, see items 1, 2, 6-9 of the Figure, col. 1 lines 21-40;

“and second means for performing normal scan processing for successively tuning in on the receivable channel candidates temporarily registered in the storage device by the first means, to acquire and register necessary channel information”, see items 6, 7, 5 of the Figure, col. 1 line 51 to col. 2 line 15.

Claim 2 is disclosed, see col. 1 lines 29-40.

Art Unit: 2614

Claim 3 is disclosed, see items 1-3 of the Figure.

Claim 4 is disclosed, see items 8, 9, 6 of the Figure.

Claim 5 is disclosed, see col. 2 lines 22-40, col. 3 lines 1-13

**Claim 6** is rejected for the same reasons as claim 1.

Claims 7-10 are rejected for the same reasons as claims 2-5 respectively.

### ***Response to Arguments***

3. Applicant's arguments have been fully considered but they are not persuasive.

Applicant argues on page 3 last paragraph of the REMARKS that "since EPO '991 performs the second frequency (steps) scan for a channel right after the first frequency (steps) scan, there is absolute no need in EPO '991 to temporarily register the channel numbers of the channels for which the measured RF value exceed a threshold value determined in the first frequency (steps) scan." These arguments are not persuasive, EPO '991 does not perform the second frequency (steps) scan for a channel right after the first frequency (steps) scan as argued by the Applicant, because EPO '991 includes a memory 7 as shown in the Figure for temporarily storing tuning information for the different channels, and these tuning information are considered as also included the channel numbers of the channels as claimed.

### **Conclusion**

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2614

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
